

MAKE YOUR OWN BLOSSOM

Taking inspiration from Ai Wei Wei's *Blossom* you are asked to design and then make your own ceramic blossom.

Step 1: Glue this sheet into your visual diary

Step 2: Draw three thumbnail sketches of your blossoms.

Step 3: Pick one of your blossom designs, annotate why you think it is your best design and then watch the clay demonstration and get sculpting.

Step 4: Once complete your blossom will need to dry, be fired and then we will start the glazing process. This will happen after the school holidays.

Key terms to learn: slab building, joining, shaping, wedging, incising, glaze, fired, terracotta, ceramics.
